# HämoPrime® Diosmin-Hesperidin Complex

Haemorrhoid capsules. A specialised combination of nutrients and plant extracts

## PRODUCT DESCRIPTION

HämoPrime® is a carefully formulated combination of nutrients and plant extracts for anyone who is consciously concerned with venous wellbeing in their daily life. At the heart of the formula is a high-quality diosmin-hesperidin complex (DiosVein®), supplemented by rutin and quercetin (Quercefit®) in phytosome form. This creates a broad-spectrum flavonoid profile.

This base is supplemented by selected plant extracts: horse chestnut (Venocin®) with natural aescin, Boswellia serrata (Boswellin®) and traditionally used butcher's broom root extract. This botanical combination brings additional diversity to the formula and effectively rounds off the plant-based approach.

HämoPrime® is further enhanced by selected micronutrients: vitamin C contributes to normal collagen formation for the normal function of blood vessels; manganese contributes to the normal formation of connective tissue; and copper contributes to the maintenance of normal connective tissue. Vitamin B6 also contributes to the normal formation of red blood cells. HämoPrime® thus combines diosmin, hesperidin, horse chestnut extract and other plant-based substances with carefully selected micronutrients – for a conscious dietary supplement every day.

- The diosmin-hesperidin complex (DiosVein®) – for use in the treatment of haemorrhoids
- Supplemented with Boswellia serrata extract (Boswellin®) and butcher's broom root extract
- With vitamin C, manganese, copper and vitamin B6: vitamin C contributes to normal collagen formation for the normal function of blood vessels

## POSSIBLE USES

- Nutritional support for managing haemorrhoid
- Structured supplementation with diosmin, hesperidin, rutin, quercetin, horse chestnut extract and selected micronutrients
- For people with a predominantly sedentary lifestyle.
- A useful supplement for those with a sedentary or static lifestyle
- Handy for travelling and on warm days
- Vitamin C contributes to normal collagen formation for the normal function of blood vessels
- Copper contributes to the maintenance of normal connective tissue
- Manganese contributes to normal connective tissue formation
- Vitamin B6 also contributes to the normal formation of red blood cells
- Horse chestnut contributes to the maintenance of normal blood circulation
- Butcher's broom supports venous circulation
