BIOGENA

ESSENTIALS

NAC 350

Mono-preparation of highly pure NAC, the stabilized form of the essential amino acid L-cysteine

PRODUCT DESCRIPTION

L-cysteine in stabilized form

N-acetyl-L-cysteine (NAC) is the stabilized form of the essential amino acid L-cysteine. In many life situations - e.g. in old age, in the growth phase or during physical activity - the body has an increased need for amino acids. NAC is rapidly absorbed in the intestine and almost completely absorbed. L-cysteine is formed again from NAC. This amino acid is an important source of sulphur for our organism. L-cysteine is a building block of many proteins as well as the peptide glutathione. This in turn is a component of the enzyme glutathione peroxidase, which catalyzes the breakdown of oxidative hydrogen peroxide. BIOGENA NAC 350 mg contains easily absorbable N-acetyl-L-cysteine and is therefore suitable as a daily supplement.

N-Acetyl-L-Cysteine

- Contains the stabilized form of the essential amino acid L-cysteine

- Contains easily absorbable N-acetyl-L-cysteine
- Quickly absorbed in the intestine
- Free from additives

POSSIBLE USES

- For the targeted supply of L-cysteine

INGREDIENTS	PER DAILY DOSE (1 CAPSULE)	% NRV *
N-acetyl L-cysteine	350 mg	-

* % of the reference quantity according to EU Regulation 1169/2011.

INGREDIENTS

N-acetyl L-cysteine, hydroxypropyl methyl cellulose (capsule shell), bulking agent: powdered cellulose.

RECOMMENDED INTAKE

1 capsule daily taken with plenty of liquid.

PACK SIZE

180 capsules (pack for 6 months), 79 g
60 capsules (pack for 2 months), 26 g
