BIOGENA

ESSENTIALS

SAMe 200

Monopreparation of the endogenous substance S-adenosyl-methionine for cell metabolism

PRODUCT DESCRIPTION

S-adenosyl-methionine - significance for cell metabolism

SAMe (S-adenosyl-methionine) is a natural compound produced by the body which is important in the metabolism of many reactions. In the body, SAMe is formed from the essential amino acid methionine and adenosine triphosphate (ATP). Vitamin B12 and folic acid are also involved in the SAMe cycle. Unlike its precursor methionine, SAMe is only present in very small amounts in food. The importance of this substance is mainly based on its property as an important donor of methyl groups in the metabolism. With Adonat®, Biogena uses a high-quality brand raw material that guarantees the stability of the product. In addition, the so-called "DRcaps™" protect the capsule contents from the acid stomach contents and release the ingredient only in the intestine - Biogena thus ensures optimum bioavailability.

SAMe 200

- With activated methionine
- Contains 200 mg of the body's own substance SAMe

- High proportion of S-adenosyl-methionine
- Activated methionine: branded raw material Adonat®
- Particular stability and purity
- Targeted supply of S-adenosyl-methionine

POSSIBLE USES

- For the targeted intake of S-adenosyl methionine

INGREDIENTS	PER DAILY DOSE (1 CAPSULE)	% NRV *
S-adenosyl methionine	200 mg	-

* % of the reference quantity according to EU Regulation 1169/2011.

INGREDIENTS

S-adenosyl methionine, capsule shell (hydroxypropyl methyl cellulose, gelling agent: gellan gum), bulking agent: powdered cellulose.

RECOMMENDED INTAKE

1 capsule daily taken 1/2 hours before a meal with plenty of liquid.

PACK SIZE

60 capsules (2 month supply), 35 g
