VenoPrime® Vein Complex

Premium vein complex with plant extracts & micronutrients

PRODUCT DESCRIPTION

Here is a faithful, natural English translation that preserves the original meaning and structure while using terminology appropriate for dietary supplements:

VenoPrime® is a thoughtfully formulated vein complex for anyone who spends long periods sitting, standing, or travelling in everyday life. During such times, good circulation in the legs and leg veins is important. These vein capsules combine a diosmin-hesperidin complex (DiosVein®) with selected plant extracts from red vine leaf (VinOleaf™), grape seed extract with OPC, horse chestnut (Venocin®), and butcher's broom root. Horse chestnut (*Aesculus hippocastanum*) contributes to the maintenance of healthy venous circulation in the legs, while butcher's broom (*Ruscus aculeatus*) also supports circulation.

The formula is complemented by essential micronutrients with well-defined functions in the body: Vitamin C contributes to normal collagen formation for the normal function of blood vessels (veins). Copper contributes to the maintenance of normal connective tissue, and manganese contributes to the normal formation of connective tissue. Vitamin B6 contributes to normal energy-yielding metabolism and the normal formation of red blood cells.

VenoPrime® – vein capsules with a plant compound complex and micronutrients for blood vessels and connective tissue.

- With a diosmin-hesperidin complex as the flavonoid base
- Red vine leaf extract, OPC & horse chestnut extract
- Supplemented with butcher's broom root extract
- With vitamin C, copper, manganese & vitamin B6
- Vitamin C contributes to normal collagen formation for the normal function of blood vessels (veins)
- Vein capsules for days with prolonged sitting, standing or travelling

POSSIBLE USES

- For days with prolonged sitting, standing or travelling
- For the maintenance of healthy venous circulation in the legs
- For the normal function of blood vessels (veins)

- Vitamin C contributes to normal collagen formation for the normal function of blood vessels
- Copper contributes to the maintenance of normal connective tissue
- Manganese contributes to the normal formation of connective tissue
- Vitamin B6 contributes to the normal formation of red blood cells
- Horse chestnut (*Aesculus hippocastanum*) contributes to the maintenance of healthy venous circulation in the legs
- Butcher's broom (*Ruscus aculeatus*) supports circulation
