

Zinc Drops

Your daily immune buddy: Zinc drops with organic zinc gluconate for adults and children, with a fruity lemon-lime flavour

PRODUCT DESCRIPTION

Looking for a simple way to support your immune system every day? Our BIOGENA Zinc Drops make it easy.

The liquid formula with organic **zinc gluconate** provides you with 5 mg of elemental zinc per daily dose (½ pipette) – highly bioavailable and particularly gentle. And best of all: with its lemon & lime flavour, taking it is actually really enjoyable – completely free from alcohol, but with a really fruity note.

Why zinc?

Zinc is one of the all-rounders among micronutrients – our body needs it daily. That's why a continuous supply is so important, especially if you want to actively support your immune defenses.

Zinc contributes to the normal function of the immune system and helps protect cells from oxidative stress. It also plays a role in maintaining normal skin, hair, and nails – and much more.

In short: Zinc is involved in many processes in the body – and our drops help you easily and pleasantly integrate your daily zinc intake into your routine.

- With organic zinc gluconate – well absorbed and gentle for daily use
- Well-dosed: 5 mg of zinc per daily portion – also ideal for children
- Fruity lemon & lime flavour – easy and tasty to use
- Easy to dose thanks to pipette – full control with every portion
- Water-based

POSSIBLE USES

- **To support increased needs** – for example, with higher phytic acid intake (e.g. from legumes, whole grain products), during physical activity, or in special life situations.
- **If you want to support your immune system** – e.g. during the colder months or times of increased stress

Zinc contributes to:

- the normal function of the immune system
- protecting cells from oxidative stress
- normal fertility and reproduction
- maintaining normal skin, hair, nails, and bones
- maintaining normal vision and supporting cognitive function
- normal macronutrient metabolism
- normal DNA and protein synthesis and also has a role in cell division.
